

## Movement and Action in Learning and Development: Clinical Implications for Pervasive Developmental Disorders

By Ida Stockman

Academic Press. Hardcover. Book Condition: New. Hardcover. 400 pages. Dimensions: 9.0in. x 6.0in. x 1.2in. This book presents theories and clinical practices for dealing with children diagnosed with pervasive developmental disability or PDD. These are children who have a wide range of disabilities that affect their participation in even the most routine events of daily life, such as eating, dressing, bathing, and so on. Unlike many who are diagnosed with classic autism, however, these children seem to have normal social behavior, normal physical appearance, the ability to learn, hear, see, and move their bodies at will—in other words, none of the well-known reasons that cause autistic and other children to develop differently. These children have the use of all their senses, but their brains are unable to process the information that is fed through them. While much new research is being done in genetics and neurobiology to explain why something in these children has gone fundamentally wrong with their development, clinicians and therapists who deal with them on a daily basis have needed to develop practical therapies based on how the children react to their environments. *Movement and Action in Learning and Development* suggests that when therapists plan treatment strategies, childrens...
